

You focus on running your business, and we'll ensure your projects stay on track, within budget, and avoid risk. Without needing to subscribe to additional software, we use **TrueProject** to provide **predictive intelligence** and oversight for your project portfolio.

**All for
\$7,500 /
month**

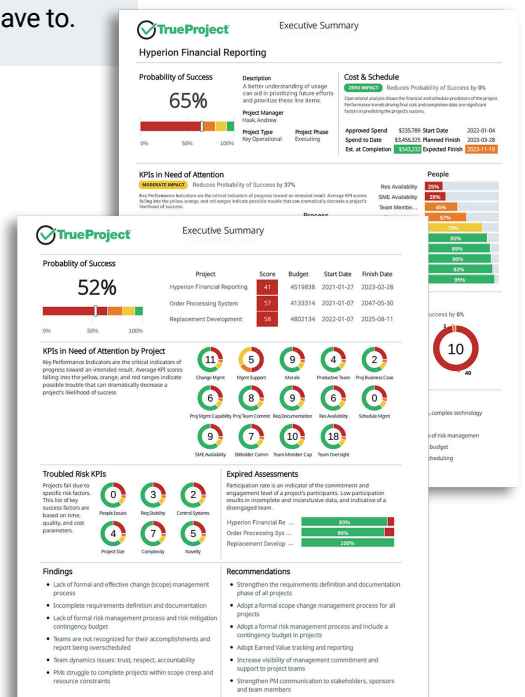

We'll Do the Rest

We handle the governance, oversight, and reporting so you don't have to.

With continuous, predictive monitoring, we identify risks before they escalate, saving you time, money, and potential project failures.

Our reports provide the insights you need to make informed decisions that keep projects on track, even in complex environments.

Free up your team from having to manually track and report on project progress. We automate it all for you, so your team can focus on delivering results.

TrueProject Insight as a Service is a managed service offering that leverages the core capabilities of TrueProject to provide organizations with comprehensive, AI-driven oversight and governance of their projects. This service utilizes TrueProject's advanced warning systems, predictive intelligence, and real-time analytics to preemptively address potential project challenges. By continuously monitoring key performance indicators (KPIs), TrueProject Insight as a Service ensures that projects not only remain on track and within budget but also consistently align with strategic business objectives, thus enhancing overall project health and performance.

Included Are:

Weekly Assessments for Teams

Your project teams receive personalized, project-specific assessments to analyze the stakeholder data against KPIs and provide predictive insights.

Weekly Guidance for PMs

Your project managers receive weekly guidance, including actionable insights and risk alerts based on the latest data and trends from your projects.

Executive Reports and Insights

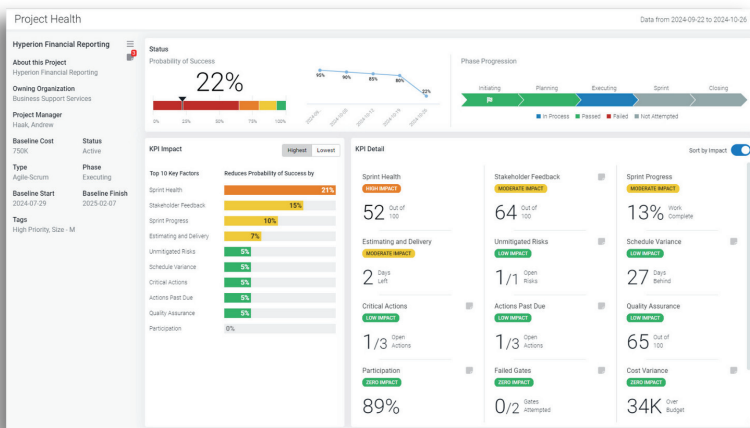

You will receive weekly and monthly comprehensive, data-driven insights on your projects, including risks, project health, and key metrics that matter.

HealthCheck Summary

Key Performance Indicators

Key performance indicators are a measure used to evaluate the success of an organization, its employees, etc. to meet objectives for performance. There are 21 KPIs that are broken down into two groups, people and process. A questionnaire collects team feedback about their awareness of the objective aspects of your project.

Your Projects, Independent Oversight. Fewer Surprises. More Success.
